Parent/Teacher Partnership Forms

We have a system of Parent/teacher communication. This system is to inform myself and staff about anything you feel may affect your child during their time at school. For example this may be something as simple as a new person collecting your child from school, or it may be something more significant such as your child writing their name for the first time. In other words any development that you feel the staff should be made aware of in order to more effectively direct lessons.

Parents should complete a form whenever they want to inform staff about relevant developments in their child's behaviour. Completed forms will then be kept with your child's assessment portfolio. A sample form is below and additional forms are available from school.
